

TXA - Tensioner

A tensioner is a critical component in belt-driven systems. It applies and maintains the precise, constant tension required on belts such as the serpentine or timing belt. This ensures optimal power transmission, prevents slippage, reduces wear, and extends the lifespan of the belt and pulleys.

Part No.	DESCRIPTION
1333543	3176
1900634	3116, C10, C12
1382514	3126, 3126B, C7
1352151	3126B, C7
1900649	3196, 3176C
1333544	C10, C12
1333545	C10, C12
